IN THE BOARD OF SUPERVISORS

County of San Luis Obispo, State of California

		day	, 20
PRESENT: Supervisors			
ABSENT:			
RESO	LUTION NO.		

RESOLUTION OF THE BOARD OF SUPERVISORS
OF THE COUNTY OF SAN LUIS OBISPO
CONTINUING THE ROAD IMPROVEMENT FEE
FOR ALL DEVELOPMENTS WITHIN PORTIONS OF
THE ESTERO PLANNING AREA
OF THE COUNTY OF SAN LUIS OBISPO, AND
ADOPTING THE REQUIRED ANNUAL UPDATE

The following Resolution is hereby offered and read:

WHEREAS, the Board of Supervisors of the County of San Luis Obispo has adopted Ordinance No. 2379 creating and establishing the authority for imposing and charging a road improvement fee; and

WHEREAS, on April 5, 1994, the Board of Supervisors did adopt Resolution No. 94-146 imposing a road improvement fee for all developments within portions of the Estero Planning Area of the County of San Luis Obispo (referred to herein as the "Los Osos Area"); and

WHEREAS, said Resolution No. 94-146 provided for an annual update of said road improvement fee; and

WHEREAS, the Board of Supervisors has reviewed the Los Osos Circulation Study Update of 2013 and found that it includes all required elements of the annual update (attached hereto and incorporated herein as Exhibit "A"); and

WHEREAS, the Circulation Study has previously been titled the South Bay Circulation Study, and is hereafter referred to as the Los Osos Circulation Study; and

WHEREAS, the "South Bay Circulation Study" of 1994 and the 2013 Update describe the impacts of new development on existing road facilities and improvements within certain portions of the Los Osos Area, and analyzes the need for new road facilities and improvements required by said new development, and sets forth the relationships among

new development, the needed road facilities and improvements, and the estimated costs of those facilities and improvements; and

WHEREAS, on December 6, 2011, the Board of Supervisors did adopt Resolution No. 2011-390 approving a mitigated negative declaration for this Roadway Improvement Fee Program; and

WHEREAS, said Los Osos Circulation Study Update of 2013 was available for public inspection and review fourteen (14) days prior to the public hearing of this Resolution; and

WHEREAS, the Board of Supervisors finds as follows:

- A. The purpose of this Road Improvement Fee is to finance road facilities and improvements in order to reduce the impacts of traffic generated and caused by new development within the Los Osos Area.
- B. The road improvement fees collected pursuant to this Resolution shall be used to finance only the capital improvements described in the text and/or identified in Appendix "A" of Exhibit "A," attached hereto and incorporated herein.
- C. After considering the South Bay Circulation Study of January 1994, prepared jointly by CH₂M Hill, the CSA-9 Advisory Group and the County Department of Public Works, and after considering the testimony received at the public hearing on this matter, the Board of Supervisors approved said Study on April 5, 1994, with findings that new development in the Los Osos Area will generate additional traffic within said area and will contribute to the degradation of the level of service of the road system in said area.
- D. The Board of Supervisors further finds that there is a need in the Los Osos Area for road facilities and improvements and said facilities and improvements have been called for in or are consistent with the County's General Plan and the Los Osos Circulation Study.
- E. The Board of Supervisors further finds that the facts and evidence presented establish that there is a reasonable relationship between the need for the described road facilities and improvements and the impacts of the types of development described in paragraph "2. Amount of Fee." below for which the corresponding fee is charged, and, also there is a reasonable relationship between the fee's use and the type of development for which the fee is charged, as these reasonable relationships or nexus are in more detail described in the San Luis Obispo County General Plan and the South Bay Circulation Study and the Los Osos Circulation Study 2013 Update.
- F. The Board of Supervisors further finds that the cost estimates set forth in Exhibit "A" are reasonable cost estimates for constructing the said facilities, and the fees expected to be generated by new development will not exceed the percentage of these costs attributable to new development.
- G. The Board of Supervisors further finds that: (1) an account or fund has been established for capital road improvements and that funds have been appropriated and a proposed construction schedule including approximate funding and commitment dates has been adopted as set forth in Exhibit "A" hereto; and that (2) the County has already expended

funds for capital road improvements within said area. As used in this section, "appropriated" means authorization by the Board of Supervisors to make expenditures and incur obligations for a road facility or improvement projects shown in the Capital Improvement Program (Exhibit "A").

NOW, THEREFORE, BE IT RESOLVED AND ORDERED by the Board of Supervisors of the County of San Luis Obispo, State of California, as follows:

- 1. The recitals set forth hereinabove are true, correct, and valid.
- 2. This Resolution is adopted for the purpose of imposing and collecting within the Los Osos area those road improvement fees established for new development by said Ordinance No. 2379, and the provisions of said Ordinance are incorporated herein.
- 3. No additional environmental review is required under the California Environmental Quality Act because no changes are being made to the Roadway Improvement Fee Program in the Los Osos Area of the Estero Planning Area that was previously approved by the Board and addressed in the Mitigated Negative Declaration adopted on December 6, 2011. No substantial changes have occurred with respect to the circumstances under which the project is to be undertaken; and no new information of substantial importance has been presented indicating that the project will have any potential impacts not discussed in the Mitigated Negative Declaration.
- 4. <u>Amount of Fee.</u> The amount of the road improvement fee within the area of the Los Osos Circulation Study shall be as follows:

Residential	pk hr trip	\$4,106
Retail	pk hr trip	\$2,023
Other	pk hr trip	\$3,112

For any new development wherein there are one or more residential uses combined with one or more other land uses, the number of peak hour trips caused or generated by said new development shall be determined as follows:

- (1) The number of peak hour trips caused or generated by the residential use(s) and the number of peak hour trips caused or generated by the non-residential land uses shall be separately determined and then,
- (2) The total road improvement fee for the new development shall be computed by multiplying the number of peak hour trips determined in subparagraph 4 above for each land use by the appropriate road improvement fee for each land use and then summing the results.

The number of peak hour trips caused or generated by a proposed new development project will be determined by the Director of Public Works in the manner set forth in the "Policy of the Board of Supervisors for Determination of Peak Hour Trips, "which is attached hereto as Exhibit "B" and incorporated herein by reference.

- 5. <u>Time of Imposition of Fee</u>. The amount of said road improvement fee for any new development project with said area shall be determined for, and shall be imposed upon, such new development project at the time of the grant of approval of an application for new development, and shall be a condition of approval of said new development project.
- 6. <u>Time of Payment of Fee.</u> The road improvement fee established by said Ordinance No. 2379 and adjusted by this and subsequent resolutions shall be paid for by new development as follows:
 - (a) For new development that is solely residential (except for a mobile home park), the fee shall be paid prior to the issuance of a building permit for the new development.
 - (b) For new development that is mobile home park, the fee shall be paid within 90 days after the date of approval of the development plan authorizing establishment of the mobile home park or prior to approval by the State Department of Housing and Community Development of an application for a permit to construct the mobile home park, whichever occurs first.
 - (c) For new development that is non-residential or that is partly residential and combined with another land use(s) or which is a mobile home park, the fee shall be paid prior to issuance of any permit or approval required for the new development and prior to any commencement of a new development project or at the time of issuance of any required building permit, whichever is later.
 - (d) The provisions above may be adjusted or modified regarding time of payment pursuant to resolution 2011-222 adopted on July 26, 2011.
- 7. <u>Use of Fee.</u> The road impact fee shall be solely used: (a) to pay for those road facilities and improvements described in Exhibit "A" hereto to be constructed by the County; (b) for reimbursing the County for the new development's fair share of those capital road facilities and improvements constructed by the County in anticipation of the new development; or (c) to reimburse prior developers who previously constructed road facilities and improvements described in Exhibit "A" attached hereto, where those facilities and improvements were beyond those needed to mitigate the impact of said prior developer's project or projects in order to mitigate the foreseeable impacts of anticipated new development.
- 8. <u>Fee Review</u>. Annually, the Director of Public Works shall review the estimated cost of the described road facilities and improvements, the continued need for those road facilities and improvements, and the reasonable relationship between such need and the impacts of the various types of new development pending or anticipated and for which this fee is charged. The Director of Public Works shall report his or her findings to the Board of Supervisors at a noticed public hearing and shall recommend to the Board of Supervisors any adjustment to this fee or any other action as may be needed.

9. <u>Effective Date</u> . Pursuant to Section 66017 of the California Government Code, the effective date of this Resolution shall be sixty (60) days from the date of adoption of this Resolution.
10. <u>Judicial Action to Challenge This Resolution.</u> Any judicial action or proceeding to attack, review, set aside, void, or annul this Resolution shall be brought within 120 days of its effective date.

Exhibit A 2013 Update Los Osos Circulation Study

On April 5, 1994 the Board of Supervisors approved the Los Osos Circulation Study and adopted a Resolution imposing road improvement fees on new development under the provisions of Ordinance 2379. The Board adopted the most recent update of the Los Osos Circulation Study on November 20, 2012.

Building Activity

Since the last Update, there were two permits issued in the Los Osos fee area; one was for a single family residence and the other for a non-retail commercial building. The reporting period of this update is from July 1, 2012 through June 30, 2013.

Road Improvement Fund

	FY 2012/2013
Fees Received (+)	\$4,841
Interest (+)	\$584
Expenditures (-)	\$66,088
Ending Cash Balance (06/30/2013)	\$178,076

Fee Appeals

There were no Road Improvement Fee appeals during the last fiscal year.

Transportation Improvements

The Los Osos Circulation Study contains a list of recommended improvements for several modes of transportation in the community as well as projects from the adopted Capital Improvement Program that are funded through Road Improvement Fees.

Projects under Development

South Bay Boulevard Bridge, Seismic Retrofit

The bridge has been identified a needing modifications and possibly a complete replacement. Public Works staff is working with a consultant to complete the work and construction will be stating in 2018. Funding is through the Federal Highway Bridge Program.

LOVR Street Improvements Doris to Pine

The Public Works Department has received a grant that provides matching funds to allow for a section of this project to be completed. The funded project will construct left turn channelization for driveway access, bike lanes, crosswalk upgrades, and address drainage issues.

The County has applied for and received matching funds from the State-Local Partnership Program (SLPP). This program provides up to a 100% match for roadway impact fee funded projects from the RIF Program. Due to this additional funding then Public Works would be able to construct the portion of this improvement between Pine and Doris Avenues.

Construction is anticipated to be complete this winter.

Road Improvement Fees

Construction costs continue to be low. The lower costs are related to the current economic conditions, and the costs of the labor and materials needed for constructing these projects have not decreased. This leads us to believe that the current low construction costs will not continue for the long run. In addition these costs are only a portion of the total project costs covered by the fee. The other costs include environmental work, permitting, design, right-of-way, and other project development costs. Over the last few years these costs have remained the same or risen.

Staff is recommending continuing the existing the fee schedule as shown below:

Land Use	Fee
Residential	\$4,106/pht
Retail	\$2,023/pht
Other	\$3,112/pht

Alternative Modes of Transportation

Pedestrian Circulation Network

Many streets within Los Osos originated as unpaved minor roads without shoulders or sidewalks. In these cases pedestrians must use. Intermittent paths adjacent to the roadways. In some areas along Los Osos Valley Road and Ninth and Tenth Streets, sidewalks are provided. Sidewalks are also provided bordering schools. In addition, sidewalks are available along streets serving new development, in accordance with the applicable design standards.

Bicycle Circulation Network

The County Bicycle Advisory Committee (BAC) is ad hoc advisory committee which provides a recognized formal source of input and perspective for bicycle transportation planning and implementation within the unincorporated areas of the County. The BAC meets quarterly and works together with County staff to prepare and update County Bikeways Plan which was last adopted by the Board of Supervisors in 2010.

The committee has established a class system to designate bikeways within the County as follows:

• Class I Bikeway (Bike Path) provides a completely separated right-of-way for the exclusive use of bicycles and pedestrians with cross flow minimized.

- Class II Bikeway (Bike Lane) provides a striped lane for one-way bicycle travel on a street or highway. Class II bikeways are contiguous with the adjacent motor vehicle travel lanes.
- Class III Bikeway (Bike Route) provides for shared use with pedestrian or motor vehicle traffic. Bike route signs designate Class III bikeways.
- Class IV Bikeway (Bike Access) is a roadway which has been identified as a satisfactory place to ride.

The existing and proposed bicycle facilities in Los Osos are in the County Bikeways Plan located at the following website: http://www.slocounty.ca.gov/Assets/PW/Traffic/BAC/2010+Bikeways+Plan.pdf.

Trail Network

The Board of Supervisors adopted the County Parks and Recreation Element in December 2006. The Parks and Recreation Element establishes policies and programs to provide and maintain parks, recreation, and natural areas within San Luis Obispo County including trails.

The Parks and Recreation Element is located at the following website: http://www.slocountyparks.com/information/parkprojects.htm#parksrecreationel ement.

Public Transportation System

The public transportation system in Los Osos refers to a wide variety of services including, fixed time transit services, Dial-A-Ride, and Ridesharing. Transit service in Los Osos is provided by the San Luis Obispo Regional Transit Authority (RTA). RTA provides three routes within the community including, Route12A, Route 12A Express, and Route 12b. Route 12A provides service between San Luis Obispo, Cuesta College, Morro Bay, and Los Osos on Monday through Friday. Route 12A Express runs directly between Los Osos and San Luis Obispo, one bus travels to San Luis Obispo in the morning and one bus returns in the evening. Route 12B provides service between San Simeon, Cambria, Cayucos, Morro Bay, San Luis Obispo, and Los Osos on weekends. For more information on these services visit www.slorta.org/.

Ridesharing includes carpools, vanpools, and other employer-based services. San Luis Obispo County Regional Rideshare facilitates programs encouraging reduced vehicle miles traveled. Rideshare recently developed Trip Link an online commuter resource. Trip Link can find and match carpools (casual and work), vanpools, and bike buddies, track commuter trips, and connect parents of K-12 students for School Pools. Benefits of Trip Link include guaranteed rides home and lucky bucks, more information about Rideshare and Trip Link can be found at http://rideshare.org.

Notes

Pk Hr Tp: PM peak hour trips, as determined by the Board of Supervisors' Policy

The "Residential" category includes single-family and multi-family dwellings, hotels, motels and camping facilities.

The "Retail" category includes retail merchandise, restaurants, service stations, post offices and financial institutions.

All other types of land use will be charged at the rate listed above as "Other."

List of Acronyms

USHA = Urban State Highway Account RSHA = Regional State Highway Account

pht = peak hour trip

Exhibit "B" POLICY OF THE BOARD OF SUPERVISORS FOR DETERMINATION OF THE NUMBER OF PEAK HOUR TRIPS

SECTION ONE: PURPOSE

1.01. This Policy is intended to be used in implementing the Resolution of the Board of Supervisors of the County of San Luis Obispo Imposing a Road Improvement Fee etc., (hereinafter referred to as Resolution) to which this Policy is attached as an exhibit, which Resolution is adopted under the authority of San Luis Obispo County Ordinance No. 2379.

SECTION TWO: DEFINITIONS

- 2.01. "Accident History." A summary of the amount and type of reported vehicle collisions occurring during the preceding five years within the area of study.
- 2.02. "Fee Area." The particular area(s) set forth in the Circulation Study, wherein the new development lies.
- 2.03. "Existing Trips." Trips generated by a current or previous use of the property which use is being replaced by new development. In order to receive credit under Section 3.01(b) of this Policy, said current or previous use must have been in existence at the time the most recent Circulation Study was adopted.
- 2.04 "Floor Area." The square footage of a building shall have the same meaning as the section entitled Gross Area: as set forth in Chapter 1 of the Institute of Transportation Engineers' <u>Trip Generation Manual</u>, which book is more completely described in Section 3.01(a) of this Policy.
- 2.05. To "Generate Additional Traffic" shall mean both the production and the attraction of vehicular trips.
- 2.06. "Level of Service." A qualitative measure describing operational conditions within a traffic system, and their perception by motorists, as defined in the most recent edition of the <u>Highway Capacity Manual</u> Transportation Research Board, Washington, DC (<u>Highway Capacity Manual</u>).
- 2.07. "Level of Service C" shall have the meaning as set forth in the <u>Highway</u> Capacity Manual:

Level of Service C is in the range of stable flow, but marks the beginning of the range of flow in which the operation of individual users becomes significantly affected by interactions with others in the traffic stream. The selection of speed is now affected by the presence of others, and maneuvering within the traffic stream requires substantial vigilance on the part of the user. The general level of comfort and convenience declines noticeably at this level.

- 2.08. A "Pass-by Trip" is an existing trip that is diverted to a new development from an adjacent street and is not a new trip that is assigned to the adjacent streets due to the new development. Pass-by trips are excluded in calculating new trips to be generated by a new development.
- 2.09. "Peak Hour Trip" shall mean a single or one-directional vehicle movement which either enters or exists the site of a new development during the hour of the day in which the highest hourly traffic volume is measured on the road(s) adjacent to the new development.
- 2.10. "Prevailing Speed." The speed, at or below which eighty-five percent of vehicles are traveling on a roadway.
- 2.11. A "Road Impact Fee Study." or RIFS: is a written study that evaluates and comments on all of the following:
 - A. Evaluate existing conditions on roads which will be affected by the proposed new development. These roads may be within the Fee Area and within any adjacent areas as required by the Director of Public Works. This evaluation of existing conditions on said roads shall include: (1) levels of service, (2) prevailing speeds, (3) stopping sight distance, and (4) accident history, and such other relevant and necessary items as are required by the Director of Public Works.
 - B. Estimate future conditions on roads which are likely to be affected by the proposed new development. These roads may be within the Fee Area and within any adjacent areas as required by the Director of Public Works. The study shall include an estimate of trip generation, if any, for each unit of the proposed new development project. The trip generation estimate may be adjusted to reflect pass-by trips and may be used for computing the fees required by Chapter 13.01 of the San Luis Obispo County Ordinance Code.

The said forecast of future conditions shall be compared with the Circulation Study, to determine if the recommendations in the Circulation Study are adequate to maintain a Level of Service C, or better, for the affected roads after completion of the proposed new development project.

C. Include such additional inquiries, evaluations and comments as the Director of Public Works determines are relevant and reasonably necessary for a comprehensive evaluation of the impacts of the proposed new development project on the said roads.

The RIFS shall be prepared by a qualified engineer licensed as a civil or traffic engineer by the State of California.

The RIFS shall be subject to the review and approval of method and accuracy by the Director of Public Works.

- 2.12. "Road." A way or place of whatever nature, publicly maintained and open to the use of the public for purposes of vehicular travel. "Road" includes "street", and "highway", and "bridge."
- 2.13. "Stopping Sight Distance." The length of roadway ahead that is visible to the driver. The minimum sight distance available on a roadway should be sufficient to enable a vehicle traveling at or near the design speed to stop before reaching a stationary object in its path.
- 2.14. "Trip Generation." The total number of vehicle trips which will enter or exit a given development project. Trip generation includes trips per weekday, trips per hour for the peak hour, and other cases as determined necessary by the Director of Public Works.
- 2.15. "Trip." A single or one-direction vehicle movement which either enters or exits the site of a development project.

SECTION THREE: DETERMINATION OF PEAK HOUR TRIPS.

3.01. The number of peak hour trips generated by new development shall be computed using the following formula:

Number of
Units in the X Trip Generation = New Peak Hour
New Development per New Unit Trips

A "Unit" is a physical, measurable or predictable variable which quantifies the particular new development (e.g., floor area, employees, acres, dwelling units, etc.). The peak hour trip generation rate shall be based upon the highest trip generation rate possible for the proposed new development. Eligible existing trips shall be deducted from the number of peak hour trips generated by the new development.

- 3.02. "Trip Generation per New Unit" shall be determined as follows:
 - A. The trip generation rates, for the peak hour of adjacent streets, shall be based on the most recent edition of the <u>Trip Generation Manual</u>, Institute of Transportation Engineers, 525 School St., SW, Suite 140, Washington, DC 20024-2729.
 - B. If no published rates are available from this source, trip generation rates will be determined by the Director of Public Works.
 - C. If the Director of Public Works requires it or if the applicant for the new development so elects, the Trip Generation per New Unit which will be caused or generated by the proposed new development may be determined by the Director of Public Works through the use of a Road Impact Fee Study rather than by the method set forth in Section 3.02(A) or 3.02(B) hereof. If a Road Impact Fee Study is to be used, the Director of Public Works shall request proposals for this work from engineers licensed as civil or traffic engineers by the State of California, and shall award a contract for the production of the RIFS with all costs to be borne by the applicant for the new development.
